WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--25 June 1986

CIPC Organizational Activities

- o Arrangements have been completed for the 30 June CIPC meeting. We are presently confirming attendance. Your meeting notebook will be completed within the next two days.
- o The next CIPC meeting has tentatively been scheduled for 21 July at 1500 hours--your schedule is open on this date.
 - The primary agenda items are the Collection Strategy Report [redacted] and possibly problems dealing with reporting on terrorist activities.
 - The latter item is the subject of our meeting with [redacted] on 27 June at 1100 hours. A new, and very sensitive, compartment has been established at the direction of the DCI to handle certain terrorist information. There are problems associated with this compartment that Art wants to table at a CIPC meeting. I told Art that few people are cleared for this information. (Thus far, only you and I have been cleared.) He therefore wants to discuss the problem with us before it is tabled at a CIPC meeting.
 - Art may press you to table this reported problem at the 30 June meeting. However, there is insufficient time to get the members cleared and in some instances we may have difficulty getting them cleared, if at all.

Intelligence Support to SDI - [redacted]

- o We will not know exactly where we stand on the inputs needed by the SDI Working Group until the group meets on 24 June. [redacted] and the other members of the group will provide any available inputs and a status report at that time. Carlos will request that remaining inputs be put into writing, expanded to cover points not addressed in the responses to PPS, and provided to him or Rich by mid-July.

SUBJECT: Weekly Activities & Status Report for the DD/ICS--25 June 1986

- o During the past week, Rich received an input from the Office of the Undersecretary of the Air Force for Space Systems (SAFSS). The prospects look good for their active participation.

25X1 NFIP Support for Contingency Operations -

- o The working group met on 24 June to discuss the outline of the study. Additionally, the working group began to focus on the big issue of whether or not the present "system" requires only fine tuning or a major overhaul. Results of that debate will drive much of the study.

25X1 Intelligence as a Force Multiplier -

- o At its meeting on 18 June, the Force Multiplier Working Group addressed a methodology for focusing its efforts on NFIP support to theater war fighting. This focus will be embedded in the final TOR. The next meeting of the group (25 June) will be devoted to a discussion of Agency contributions.
